

**CONNECTIONS**  
Kidsville

The Nation's Favorite Fun Family Newspaper  
 Kidsville News! Brainworks Worksheet  
 February Enrichment Activities  
 Grades 3-6

**Students:** After reading "Connections," fill in the tree map below with information about volunteerism. In the large boxes list three categories which are the primary modes of volunteering discussed in the article. In the small boxes under each main category, write at least four details or facts about each method of helping evidenced in the article.

**Challenge:** Using your prior knowledge of the subject, write more details or facts by filling in the extra boxes provided.

February Enrichment Activities  
Grades 3-6

**Students:** After reading “Around the World,” answer the questions below in complete sentences. Provide as many details as possible.

1. Why should people reduce, reuse and recycle?
2. How does a reduce, reuse and recycle lifestyle help water and air quality and save money?
3. How can people reduce, reuse and recycle?
4. Describe ways you personally plan to reduce, reuse and recycle in your home.

February Enrichment Activities  
Grades 3-6

**Students:** After reading "Wildville," read the stories below about pets. In each case, explain what you would do as an eco-friendly pet owner and why. **Parents/Teachers:** Answers are below, but the students' "why" responses may vary.

1. On your walk you see a dog using the bathroom on the sidewalk. After the dog finishes, the pet owner does not stop to pick up the waste. What would you do differently and why?
  
2. You drop your cat off to be groomed at the local pet store and notice the pet shampoos and soaps are not the all-natural products you use at home. In fact, you know the products contain harsh chemicals. What do you do and why?
  
3. You and your family are staying with out-of-town friends who were kind enough to say you could bring your dog along. Over the course of the night, your dog gets sick on the carpet but is now doing OK. What do you do and why?
  
4. You have been asked to go over to your neighbor's house to feed her dog and cat while she is away one summer weekend. In addition to the regular pet food, she leaves a note stating you can give them the table scraps on the picnic table outside. You see the scraps but smell a foul odor. What do you do and why?

Grades 3-6

**Answer Key**

**Students:** After reading "Around the World," answer the questions below in complete sentences. Provide as many details as possible.

**Parents/Teachers:** Answers are below, but #4 will vary.

**1. Why should people reduce, reuse and recycle?**

Reducing the resources we use, reusing products and recycling things that might otherwise be thrown away takes care of the Earth's natural resources and reduces waste. These practices help humans to make a positive impact on the planet.

**2. How does a reduce, reuse and recycle lifestyle help water and air quality and save money?**

Taking raw materials from the Earth contributes to pollution of airways and waterways. If we reuse items or use less, we reduce the need to make new products and therefore reduce the pollution created. The process of turning natural resources into usable things produces greenhouse gases that are released into the air, producing potentially harmful results.

We can save money by reducing, reusing and recycling because recycled or reused products are lower priced or even free as compared to new things. Reducing what we buy in the first place has to save money.

**3. How can people reduce, reuse and recycle?**

There are many ways for people to reduce, reuse and recycle. We can start by shopping for previously used items to find secondhand things to buy instead of new products. We can reuse materials at home as often as we can, too. We can reduce the amount of plastic we use or buy, especially in packaging or water bottles. If we do use plastic, recycling is important. Finally, if we take care of what we have we put off the need to buy replacements.

**4. Describe ways you personally plan to reduce, reuse and recycle in your home.**

Answers will vary.

Answer Key

**Students:** After reading “Wildville,” read the stories below about pets.  
In each case, explain what you would do as an eco-friendly pet owner and why. **Parents/Teachers:** Answers are below.

**1. On your walk you see a dog using the bathroom on the sidewalk. After the dog finishes, the pet owner does not stop to pick up the waste. What would you do differently and why?**

I would clean up after my pet using a plant-based, eco-friendly pet-waste bag and then dispose of it properly. I would clean up after my pet because I know that the bacteria-filled stool of dogs can find its way into and pollute bodies of waters.

**2. You drop your cat off to be groomed at the local pet store and notice the pet shampoos and soaps are not the all-natural products you use at home. In fact, you know the products contain harsh chemicals. What do you do and why?**

I would leave that salon and find another one that uses all-natural shampoos and soaps without harsh, toxic chemicals, fragrances, dyes and preservatives. Another choice would be to take my pet home to clean and groom it with my own products. I would react this way because I know that natural shampoos can have the same deep, effective clean without harsh, toxic chemicals, fragrances, dyes and preservatives that are not good for my pet.

**3. You and your family are staying with out-of-town friends who were kind enough to say you could bring your dog along. Over the course of the night, your dog gets sick on the carpet but is now doing OK. What do you do and why?**

I use a natural cleaning solution such as plain soap and water to clean up after my pet. I would do this because cleaners with harsh, toxic chemicals, fragrances, dyes and preservatives can harm my pet.

**4. You have been asked to go over to your neighbor's house to feed her dog and cat while she is away one summer weekend. In addition to the regular pet food, she leaves a note stating you can give them the table scraps left on the picnic table outside. You see the scraps but smell a foul odor. What do you do and why?**

I would feed the animals the pet food but throw away the rotten scraps. I would leave a note for my neighbor explaining the scraps had gotten spoiled outside, most likely from the heat. I would do this because I know that animals do not need to eat what is not good for them and because I do not want them to get sick.
